                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     TISSUE-Brain;
Okazaki N., Kikuno R., Ohara R., Inamoto S., Hara Y., Nagase T.,
Ohara O., Koga H.;
Prediction of the coding sequences of mouse homologues of KIAA gene:
I. The complete nucleotide sequences of 100 mouse KIAA-homologous
cDAAs identified by screening of terminal sequences of cDNA clones
supplied from size-fractionated libraries. ";
Submitted (CT-2002) to the EMBL/GenBank/DDBJ databases.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          149 PARGLDHIAENILSYLDAKSLCAAELVCKEWYRVTSDGMLWKKLIERMVRTDSLWRGLAE
